Filter Cart provides a convenient portable mode of off-line filtration, flushing and fluid transfer. Use it with your in-plant machinery and hydraulic equipment to achieve and maintain proper ISO cleanliness levels. Dual in-series pressure filters can provide coarse/fine particle removal or, install a water absorbing filter to obtain particulate and water removal. A SP50/60 suction filter is required to protect the pump. The powerful one horsepower motor won't bog down and when coupled with a gear pump, it provides efficient fluid transfer and filtration. Convenient features include a rear mounted motor for better balance, a drip tray and hoses.

#### Notice

Valtec Hydraulics Inc. Filter Carts include electric motors and indoor use is recommended. Exposure to rain, snow and other elements may cause electric motors to fail. Failures that result from misapplication, improper use or storage are not covered by the Valtec Hydraulic Inc warranty.

#### Fluid Compatibility

Not for use with diesel fuel or gasoline.

#### Applications

- Transferring New Oil
- Cleaning Stored Oil
- System Draining
- Line Flushing
- Hose Cleaning
- Kidney Loop Filtration
- Repairs & Equipment Rebuild Flushing
- Flushing During Equipment Commissioning

#### Features

- Rugged and durable frame
- High efficiency media
- Two pressure filters
- Safety relief valve
- Overload protected switch

#### Benefits

- Enables long service life
- Cost effective filtration
- Two-stage filtration – coarse/fine or particulate/water
- Prevents over pressurizing and damage to pump, hoses and filters
- Prevents motor from overheating
